

Home page

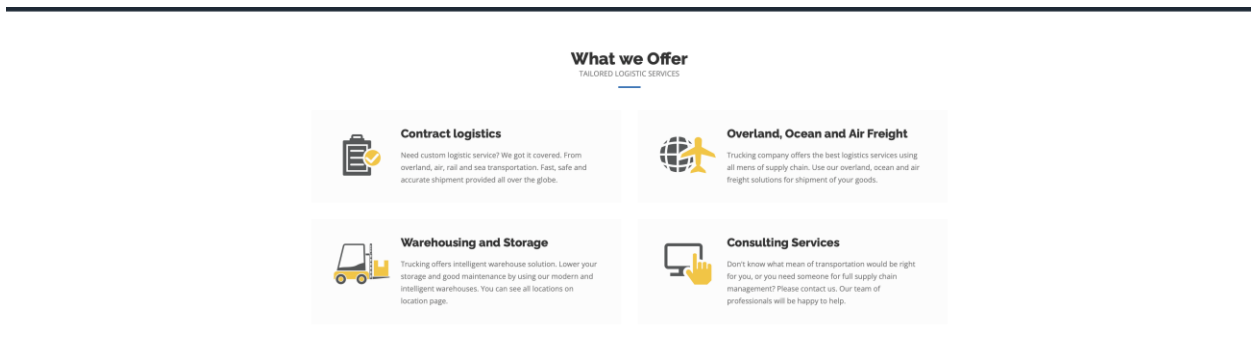

- Banner area with banner images that will be sliding banners and overlapping top 3 projects from portfolio

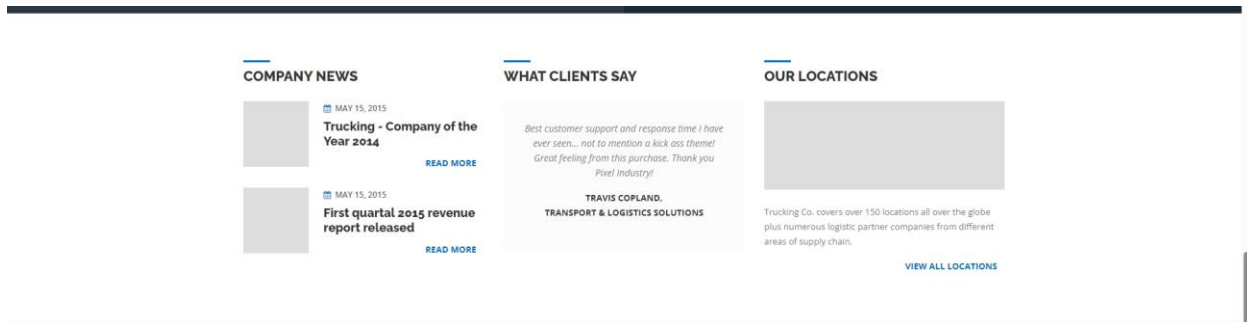

- What we offer section list our services all services from profile that is provided below, for icons please let me know to assign to Alisha if needed

Swift Byte Profile final profile (1).pdf

- After the above section we need a section that will have 3 sub sections, in the template we have this already, we just need to change the titles and data displayed, it will look like this

- 1- first on left we will show Download our Profile / Brochure change the order now button to Download, make sure this is available in backend to upload broucher, once uploaded it can only be replaced, if new broucher is uploaded it will replace the old one (deleting the old one), we must add a picture and short description and on click it must download the broucher

DOWNLOAD OUR BROCHURE

Learn more about us.
Download our annual
brochure 2015 (available in
English and German).

ORDER NOW

- 2- Second center part will have join our team, make sure we have all the require functionality to see the candidates applied for vacancies in the admin panel and to post the vacancies

JOIN OUR TEAM

Drivers needed

We are hiring drivers and have 2 opened positions. See what we offer and what we need and apply today!

APPLY NOW

- 3- Third sub section on right side we will have quick quote, this also must be managed in the backend of admin dashboard, all the inquires must be saved and retrieved in admin dashboard for view. The fields will be Type of project (this must be retrieve from a table which will hold Project types (For example Website), Project Subtype, (For Example Ecommerce), Customized (Additional Features) or Basic(If he checked additional features then ask for number of additional features), Do you have a theme? Yes / No, Phone Optional and Email : mandatory, Get Rate Quote button will display calculated default rate in dollar currency, we will need a configuration table in admin dashboard which will hold basic details of the project rates according to project type and sub type and customized or basic rates, if additional feature is checked then according to the number of features we will multiple the rate of each additional feature that is configured in the table, structure of the table will be additional feature is checked then according to the number of features we will multiple the rate of each additional feature that is configured in the table, structure of the table will be, project_type_id, project_sub_type_id, basic_rate, customized_rate, add_feature_rate

When the get rate quote button will be pressed and customized was checked the number of additional feature will be multiplied with add_feature_rate and it will be added in customized_rate and then shown to user.

In case of basic option, basic_rate will be displayed.
